SKILLS

C++ (Coding)

Python (Development)

SQL

Django

Data Structure

Algo(learning)

Data Science (learning)

ML (Learning)

PERSONAL PROJECTS

Blog Website (08/2020 - 08/2020)

- Worked on back-end developer in Django and made a Blog Website and deployed on Heroku.

Grocery Bag (12/2020 - 12/2020)

- This Project has features to **add items** in **virtual bag** and allows further modification like *delete the item* from bag or update with different numbers and search with calander filters.

Customer Segmentation (01/2021 - 06/2021)

- Working with team on Unsupervised ML model - **K-Means clustering** Here we were making cluster of targeted customer on basis of their *purchase history, Annual income, Spending Score, Age, Gender*. **For Full Report visit github.**
